

LK12 QUALITY AND ENVIRONMENTAL POLICY OF MINT OF FINLAND LTD AND AB MYNTVERKET

Mint of Finland Group aims at further developing its status as a responsible producer and supplier of circulation coins, collector coins, and other numismatic products as well as medals and related products. We are committed to conforming to the legislative obligations related to our operations. We are continuously developing our activities in the areas of quality, security, and environmental issues to correspond with changing regulations and our customers' needs.

With different actions we maintain and strengthen our position as a valued operator in our field that offers high quality, competitive products and services. Our sales and marketing operations are realized utilising the entire group structure and its strengths. We respond to the requirements of the future by constantly improving our competitiveness, production processes, motivation, and know-how.

One of the Group's most important objectives is to guarantee the safety of our personnel as well as the overall safety of the different production phases and all our activities. Security is improved by regularly assessing the risks and by constantly minimizing possible threats.

On a Group level, the development of the quality system is coordinated by the CEO in cooperation with the executive vice president. The CEO is responsible for implementing the Group's quality and environmental policy and for the implementation prerequisites. Our entire personnel participate in developing and implementing the processes of our quality system and the environmental system. Yearly goals are set for quality and environmental objectives. The implementation of these is monitored with process indicators.

Our aim is to develop our products and operations in a more environmentally friendly direction. We are aware of our responsibility for the environment and are actively decreasing the environmental effects of our business operations. We continuously develop activities that save on the use of raw materials, utilise side products, and minimize energy consumption, emissions, and waste. We favour the use of the newest technology and recycling.

The operations of Mint of Finland Group are commercially profitable and ecologically responsible. We know the expectations of our customers and can meet them competitively. We also develop our operations flexibly to comply with changing conditions.

Paul Gustafsson
President and CEO
